

Cheerful gene guessing with the game "No Gene is Perfect "

Open Science > Open Science Category 8YWc > Cheerful gene guessing with the game "No Gene is Perfect "

Guessing game for the sociable turn of the year.

Christmas is the time for social evenings with friends and family. Our game "No Gene is Perfect" is designed to provide the right entertainment. Discover the functions that are hidden behind the names of different genes together. Have fun playing.

The game instructions and cards are available on the german version of this site in the download area (click "**de**" on the right-top-corner).

The team of Open Science and the Vienna Open Lab wish you a Merry Christmas and a Happy New Year!
